## PROFESSIONAL SUMMARY

Data-driven analyst pursuing an M.Sc. in Computational Science, backed by 3+ years of software engineering experience translating complex requirements into scalable, data-informed solutions. Proficient in Python, SQL, Excel, Power BI, and Tableau, with hands-on experience in data cleaning, statistical analysis, customer segmentation, and dashboard development. Skilled at converting raw data into clear, actionable insights and communicating findings to technical and non-technical stakeholders alike.

## TECHNICAL SKILLS

|                                                                                                |                                                                   |
|------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| <b>Programming &amp; Query:</b> Python, SQL, R                                                 | <b>Visualization:</b> Power BI, Tableau, Matplotlib, Seaborn      |
| <b>Data Analysis:</b> Pandas, NumPy, Statistical Analysis, RFM Segmentation                    | <b>Databases:</b> PostgreSQL, MySQL, Firebase, MongoDB            |
| <b>Data Engineering:</b> ETL Processes, Data Cleaning, Data Validation                         | <b>BI &amp; Reporting:</b> DAX, KPI Development, Dashboard Design |
| <b>Business Analysis:</b> Requirements Gathering, Process Mapping                              | <b>Tools:</b> Jupyter, Git/GitHub, VS Code, Jira                  |
| <b>Soft Skills:</b> Stakeholder Communication, Cross-functional Collaboration, Problem-Solving |                                                                   |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                            |
